

Summer Task for Product Design

You are to download Autodesk Fusion 360 from the internet. (just search for it!)

Make sure you click the free version. As a student you get it for free.

You are to then produce a drawing of a product of your choice using the software.

E.g. Building, camera, chair, table etc.

If you have never used Fusion up there are many tutorials on the net with a fusion 360 for beginners on the link below: This is an hour long webinar.

<https://www.youtube.com/watch?v=gu7Nm0ygaow>

Print your product out and bring it to your first lesson.

Save the file. As we may want to see it to verify your work rather than a picture you downloaded!
